SUMMARY

Software Developer with 3+ years building full-stack web applications and backend services using **Java (Spring Boot)** and **Python (Django REST)**. Experienced in **REST APIs**, **AWS**, **Kafka**, **PostgreSQL**, and **CI/CD (Jenkins, Docker)**, with proven impact including **30%** workflow improvement and **40%** query-latency reduction.

EDUCATION

Master of Science, Computer Software Engineering

Arizona State University - Tempe, AZ

3.6 GPA

Aug 2023 - May 2025

Bachelor of Engineering, Electronics and Communication Engineering

Birla Institute of Technology & Science, Pilani - Hyderabad, Telangana

Jun 2017 - Aug 2021

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Technologies: Node.js, React, HTML5, CSS3, XML, JSON, YAML, D3.js, REST, Maven, Spring Boot, Spring Framework

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Supabase

Cloud: AWS (EC2, S3, ECR, EKS, SNS, RDS, Lambda, CloudWatch, SageMaker, Redshift, Kinesis)

Testing: JUnit, Pytest, Spring Test Framework, Cypress, Postman

Deployment: Jenkins, Jira, Kubernetes, Terraform, Docker, CloudFormation

Methodologies: Agile, Scrum, TDD, CI/CD, OOP, SDLC, Kanban

EXPERIENCE

Software Developer

Vizworld Inc.

Jun 2025 - Current

Minnetonka, Minnesota

- Shipped customer-facing portal features using **React**, **TypeScript**, **Tailwind**, and backend services in **Python (Django REST)** improving internal workflows by **30%**.
- Designed and integrated **REST APIs** in **Python** to support core workflows (CRUD, filtering), backed by **Supabase**.
- Built responsive, data-heavy UI flows with **HTML/CSS** and reusable components to keep UX consistent across pages.
- Used **Vercel CI/CD** (preview deploys, staging, rollback) to ship frequent releases and cut release cycle time by **25%**.
- Implemented secure authentication and role-based authorization using **JWT**, protecting routes and workflows end-to-end.
- Strengthened API security and reliability with **CORS** policy hardening, input validation, and defensive error handling.
- Optimized API efficiency through **payload shaping**, sane timeouts, and standardized error responses to improve reliability.
- Wrote maintainable, review-friendly code with clear PRs, iterative feedback cycles, and refactors to reduce tech debt.
- Improved reliability by adding **unit** and **integration tests** and participating in **Agile/Scrum** ceremonies.

Software Developer

Tata Consultancy Services (TCS)

Nov 2021 - Jun 2023

Hyderabad, Telangana

- Built and maintained **Java Spring Boot** microservices with **15+ REST endpoints** for an automotive platform; validated API behavior with **Postman** test suites.
- Optimized **Kafka**-based ECU data processing by implementing distributed consumers, increasing throughput by **30%** and reducing latency from **3.5s to 0.7s** per message.
- Refined **PostgreSQL** queries and indexes, improving database performance and reducing query latency by **40%**.
- Developed a diagnostics microservice using **Kafka Streams** to support scalable, fault-tolerant processing of vehicle events.
- Implemented secure access control using **OAuth 2.0**, **OpenID Connect**, and **JWT**-based authentication across services.
- Streamlined delivery by implementing **CI/CD** pipelines with **Jenkins**, **Docker**, and **Git** for builds and deployments.
- Supported cloud-hosted deployments using **AWS (EC2, Lambda, RDS)** and database sync workflows during release cycles.
- Strengthened service resilience with **retries/backoff patterns** and safer handling of **edge cases** in event-driven flows.
- Collaborated with cross-functional teams in **Agile** sprints to plan releases, debug execution errors, monitor logs, troubleshoot modification blockers, and ensure seamless production deployments in an Agile environment.

Software Developer

CueMath

Jan 2021 - Jun 2021

Bengaluru, Karnataka

- Improved reliability of **JavaScript**-based learning applications by debugging UI issues and optimizing interaction flows.
- Integrated content modules via **REST APIs**, ensuring consistent client-server communication and dependable data updates.
- Enhanced user experience by fixing rendering/state bugs and improving responsiveness across common learner journeys.
- Analyzed user interaction patterns to inform content changes and prioritize product improvements based on learner behavior.
- Collaborated with product teams to translate requirements into incremental releases and validate outcomes.
