SUMMARY

Java Full Stack Engineer with 3+ years of experience building cloud-native applications using **Spring Boot**, **React**, **Kafka**, **PostgreSQL**, **AWS**, and **Kubernetes**. Delivered measurable gains in workflow efficiency, query performance, throughput, and production uptime while working in Agile teams on complex platforms. Brings strong backend depth, solid frontend execution, and a track record of building reliable software that scales.

EDUCATION

Master of Science, Computer Software Engineering

Arizona State University - Tempe, AZ

3.6 GPA

Aug 2023 - May 2025

Bachelor of Engineering, Electronics and Communication Engineering

Birla Institute of Technology & Science, Pilani - Hyderabad, Telangana

Jun 2017 - Aug 2021

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Technologies: Node.js, React, HTML5, CSS3, XML, JSON, YAML, D3.js, REST, Maven, Spring Boot, Spring Framework, Spring Security, JPA/Hibernate, JSP, jQuery, Ant

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB, Supabase

Cloud: AWS (EC2, S3, ECR, EKS, SNS, RDS, Lambda, CloudWatch, SageMaker, Redshift, Kinesis)

Testing: JUnit, Pytest, Spring Test Framework, Cypress, Postman

Deployment: Git, GitHub, GitHub Actions, Jenkins, Jira, Kubernetes, Terraform, Docker, CloudFormation

Methodologies: Agile, Scrum, TDD, CI/CD, OOP, SDLC, Kanban

EXPERIENCE

Software Developer

Liberty Mutual

Jun 2025 - Current

Nashua, New Hampshire

- Delivered portal features using **React**, **TypeScript**, and **Java Spring Boot**, improved internal workflows by **30%**.
- Built **Spring Boot REST APIs** backed by **DynamoDB** to support portal workflows and reduce manual handoffs.
- Developed reusable **React UI** components for data-heavy workflows, improving consistency and maintainability across pages.
- Automated build, deployment, and rollback pipelines using **GitHub Actions** and **Jenkins**, increasing release stability and lowering deployment risk.
- Implemented authentication and role-based authorization using **JWT**, strengthening access control across protected routes.
- Strengthened API security and reliability with **CORS** hardening, input validation, and defensive error handling.
- Optimized API efficiency through **payload shaping**, **sane timeouts**, and standardized error responses.
- Deployed and orchestrated containerized services on **AWS EKS**, achieving **99.5%** production uptime.
- Increased release confidence by adding **unit** and **integration tests** and participating in **Agile/Scrum** ceremonies.

Software Developer

Tata Consultancy Services (TCS)

Nov 2021 - Jun 2023

Hyderabad, Telangana

- Built and maintained **Java Spring Boot** microservices with **45+ REST endpoints** for an automotive platform; validated API behavior with **Postman** test suites.
- Increased **Kafka** processing throughput by **30%** and reducing latency from **3.5s to 0.7s** per message by implementing distributed consumers.
- Reduced **PostgreSQL** query latency by **40%** through query tuning and indexing improvements.
- Developed a diagnostics microservice using **Kafka Streams** to support scalable, fault-tolerant processing of vehicle events.
- Strengthened cross-service security by implementing **OAuth 2.0**, **OpenID Connect**, and **JWT**-based authentication.
- Built deployment workflows using **Jenkins**, **Docker**, and **Git** improving delivery speed and release consistency.
- Supported **AWS**-hosted deployments across **EC2**, **Lambda**, and **RDS** environments during release cycles and updates.
- Improved resilience in event-driven services by adding retries, backoff handling, and safer edge-case processing.
- Partnered with cross-functional teams in **Agile** sprints to plan releases, troubleshoot blockers, and ensure seamless production deployments in an Agile environment.

Software Developer

CueMath

Jan 2021 - Jun 2021

Bengaluru, Karnataka

- Improved reliability of **JavaScript**-based learning applications by resolving UI defects and optimizing flows.
- Integrated **REST**-based content modules to improve client-server data consistency and support dependable content updates.
- Fixed rendering and state-management issues to improve responsiveness and user experience across common usage paths.
- Analyzed user interaction patterns to guide content updates and prioritize improvements based on actual learner behavior.
- Collaborated with product teams to translate requirements into incremental releases and validate outcomes.
